## BIO SKETCH

Filippo Ceccato is a Associate Professor in Endocrinology at the Department of Medicine DIMED, University of Padova, and a consultant in Clinical Endocrinology at the Endocrine Unit (expertise in pituitary and adrenal diseases), University-Hospital of Padova.

His research activity is focused on the diagnosis of pituitary and adrenal neoplasm (especially Cushing’s syndrome, adrenocortical carcinoma and adenoma, acromegaly, and adrenal insufficiency), on the clinical application of mass spectrometry for cortisol-related diseases, on the management of disease-related complications, aggressive pituitary adenomas and identification of genetic alterations in inherited diseases and endocrine tumors.

He graduated in medicine (2009, title: AIP mutations in patients with acromegaly) and he completed his residency in endocrinology and metabolism in 2015 (title: First line screening tests in patients with Cushing’s Syndrome). He completed his PhD in Endocrinology (project: Combination of medical treatment in patients with pituitary adenoma) at the University of Padova in 2018. From 2018 to 2024 he was a Junior/Senior assistant Professor in Endocrinology at the Department of Medicine DIMED.

He is principal- or sub-investigator in phase III/IV clinical trials for several treatments of pituitary adenoma, acromegaly, Cushing’s Syndrome (pasireotide, pegvisomant, metyrapone, osilodrostat, relacorilant), and he focuses his attention to the evaluation of possible novel medical therapies (or combination of known drugs). He is an invited speaker in more than 30 lectures and presenting author of more than 10 oral communications at International and National Congresses/Symposia. He is the author of more than 140 publications in peer-reviewed journals (H-Index 32, >2800 citation index.)

In 2018 he obtained the Italian National Scientific Qualification as Associate Professor in Endocrinology (MED/13, 06/D2); in 2019 The Award for Best Researcher in Endocrinology under 35 for the Italian Society of Endocrinology, in 2022 the Award for the Best Publication in the Journal of Endocrinological Investigations.

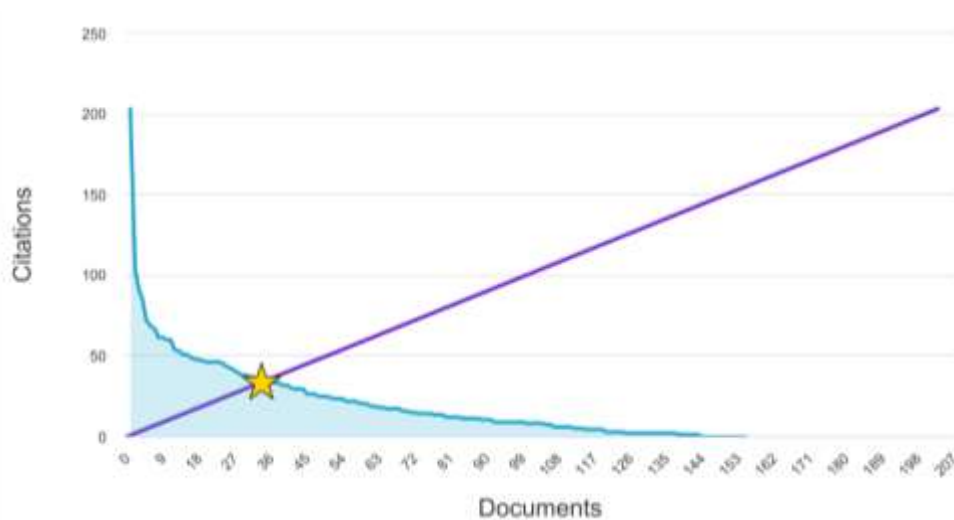

He is Senior Editor for the section “Adrenal” in the Editorial Board of Endocrine Connections, and member of the Editorial Board of the Journal of Endocrinological Investigation.

Principal Investigators in Clinical Trials

I declare that I have conducted clinical research according to good clinical practice (GCP).

- **CORT125134-456** "Glucocorticoid Receptor Antagonism in the Treatment of Hypercortisolism in Patients with Cortisol-Secreting Adrenal Adenomas or Hyperplasia (GRADIENT): A Phase 3, Randomized, Double-Blind, Placebo-Controlled Study of the Efficacy and Safety of Relacorilant" Sponsor Corcept Therapeutics Inc. Now in the extension phase CORT125134-452
- **SILYCUS-21** 2020-005605-93 "Efficacy and safety of Silycus® in Cushing's disease: a multicenter, single arm, open label, dose titration, proof of concept study (SILYCUS-21)" Sponsor IBI-Istituto Biochimico Italiano Giovanni Lorenzini S.p.A.

Sub-Investigator in Clinical Trials

I declare that I have conducted clinical research according to good clinical practice (GCP).

- **CORT125134-455** "Glucocorticoid Receptor Antagonism in the Treatment of Cushing Syndrome (GRACE): A Phase 3, Double-Blind, Placebo-Controlled, Randomized-Withdrawal Study of the Efficacy and Safety of Relacorilant" Sponsor Corcept Therapeutics Inc.

- **NBI-74788-CAH3003** “A Randomized, Double-Blind, Placebo-Controlled Study to Evaluate the Safety and Efficacy of Crinercerfont in Adult Subjects with Classic Congenital Adrenal Hyperplasia, Followed by Open-Label Treatment”. EudraCT: 2019- 004873-17. Sponsor Neurocrine Biosciences.
- **AIFA-TRS-2018-00001591 NEWACRO:** “Identification and validation of new circulating biomarkers for prediction of GH-secreting pituitary tumors sensitivity to first generation somatostatin analogs treatment and improvement of Acromegaly management” Sponsor Agenzia Italiana del Farmaco (AIFA).
- **AIFA-TRS-2018-00001632 CRACCA:** “Studio prospettico randomizzato multicentrico sull’efficacia della monoterapia con acido retinoico e cabergolina e della loro combinazione in pazienti con adenoma ipofisario ACTH-secernente.” N. EudraCT: 2019-004019-29. Sponsor Agenzia Italiana del Farmaco (AIFA).
- **CLCI699C2301:** Phase III, multi-center, double-blind, randomized withdrawal study of LCI699 following a 24 week, single-arm, open-label dose titration and treatment period to evaluate the safety and efficacy of LCI699 for the treatment of patients with Cushing’s disease. Sponsor: Novartis.
- **ACROSTUDY A6291010:** A multicenter, post-marketing surveillance study of Somavert therapy in patients with acromegaly. Sponsor: Pfizer.
- **CSOM230D2203:** An open label, multicenter, single-arm study of pasireotide LAR in patients with rare tumors of neuroendocrine origin. Sponsor: Novartis.
- **CSOM230G2304:** A randomized, double blind, multicenter, phase III trial study to evaluate the efficacy and safety of pasireotide LAR in patients with Cushing’s Disease. Sponsor: Novartis.
- **HN Registry:** An observational, prospective registry to identify demographic and clinical characteristics of patients hospitalized with euvolemic and hypervoemic hyponatremia and assess the comparative effectiveness of available treatments and the impact on resource utilization. Sponsor: Otsuka.
- **CSOM230B2411:** A Phase II trial to assess the efficacy and safety of pasireotide s.c. alone or in combination with cabergoline in patients with Cushing’s disease. Sponsor: Novartis.
- **CSOM230B2412:** An open label, multi-center pasireotide roll-over protocol for patients who have completed a previous Novartis-sponsored pasireotide study and are judged by the investigator to benefit from continued pasireotide treatment. Sponsor: Novartis.
